Video wall mounting solutions

Precision with ease. For seamless installation.

The right video wall solution

As a professional, you want to be able to install a video wall quickly and easily. The mounting should be nothing less than perfect. All of the screens need to fit together seamlessly, even in an environment that is not perfect. Our video wall solutions are meticulously designed for this very reason. You can easily align each screen on the X, Y and Z axis, and after installation the screens remain easily accessible for maintenance.

In addition, the attractive design of our solutions blends into any environment, which is important for many clients and interior architects. Whether it's on the wall, the ceiling, the floor or freestanding, we have the right video wall solution for any situation.

Vogel's. For Sure.

What we offer
- Complete mounting systems, from large to small
- Suitable for all brands and display formats
- On-site advice for complex projects
- Guaranteed quality (TÜV-5 tested)
- In-house product development
- Standard components, available from stock
- Almost 50 years of experience

TABLE OF CONTENT

Support where needed

In-house development

All Vogel's products are developed in-house. Over the years our mechanical Engineers and Product Designers have gained a lot of knowledge and experience in the field of AV installations.

This is bundled at one location in 's-Hertogenbosch, the Netherlands. We are proud to report that our Product Development Centre (PDC) is one of the most extensive R&D departments in Europe in the field of AV mounting solutions for the B2B market.

Specialized team

Based on many years of experience in the development and installation of AV equipment and video walls, we offer advice and support for complex video wall projects.

Where necessary, we even provide on-site advice. Our specialized team of Engineers and Product Designers is ready to assist you with optimal product support and service!

Installations in practice

Location
Museum Artis Micropia, The Netherlands

Project
Video wall of 4 x 16 displays

Vogel's solutions installed
70 x video wall pop-out wall mounts

Why this solution
These pop-out mounts are the best wall mount supports for this huge construction, because they allow maintenance and repair work to be carried out on each individual display. Installation is quick and easy.

Location
Ghent University, Belgium

Project
Freestanding 180° curved video wall

Vogel's solutions installed
Video wall floor stand PUC 29 Series and dedicated curved bar couplers

Why this solution
A 180° curved video wall was required. Drilling was not permitted. Vogel's developed a dedicated curved bar coupler for the creation of a freestanding 180° curved video wall with the modular components of the PUC 29 Series.

Easy and safe installation

EasyFIX™

ClickLOC™
SAFETY SYSTEM

Fast and easy installation
Our mounting solutions are equipped with the Vogel's EasyFix™ principle. This allows ultra-fine alignment on different axes, but it is also simpler. The result is a seamless curved video wall installation!

Safety and convenience first
During product development, safety and ease of mounting play a major role. We want to make it as easy and safe as possible to mount the displays. An audible click confirms that the display is attached to the system. Vogel's products are equipped with the ClickLoc™ system. You hear a clear click when mounting the display. Safety first! In addition, the ClickLoc system ensures that the display is securely attached, even in service position.

Minimalistic design
A video wall is designed to be seen, whereas the mounting system preferably not. The system has to blend in with the environment. That is why our frames are made of aluminium, which enables minimalistic design. The cables are easy to conceal with the cable management system.

- EasyFix™ - ultra-fine alignment on different axes
- ClickLoc™ system – ensuring securely attachment of display
- Integrated Cable Management
- Lightweight aluminium profiles
- Guaranteed quality – TÜV-5 certified

Universal solutions

A new revolution
Vogel's always keeps pushing the boundaries of video wall mounting solutions. The complete range of universal video wall solutions of our existing Connect-it system, is expanded with applications for LCD video walls - in terms of size, position, mobility and flexibility. In addition, we can also offer solutions for LED walls, for a futureproof standard.

Height, width and quality
A minimal number of linkable components can be combined to create a mounting solution for all sizes of video walls. Vogel's existing Connect-it interface bars and display strips are the basis for any LCD video wall mounting solution. The unique connectable poles allow video walls to ascend to great heights.

Whether you need a ceiling, floor-to-wall, floor-to-ceiling, free-standing, back-to-back, fixed or mobile solution, installation is clear and simple. One system for a host of applications, which is as durable as it is versatile, and with easy access for maintenance.

Safe and secure
Solidity, stability and safety are key. Solid support options and clear placement advice ensure correct and safe installation. And as always, this union of innovation and safety is sealed with TÜV-5 certification.

LED wall solutions

Multiple mounting options

The use of LED displays is becoming more and more popular and they can be connected in an endless number of ways. The size of a LED wall is not limited to standard sizes. That's why Vogel's has developed a LED interface that is suitable for the Vogel's Connect-it system. This means that there are many different conceivable mounting options. On the wall as well as to the ceiling or the floor.
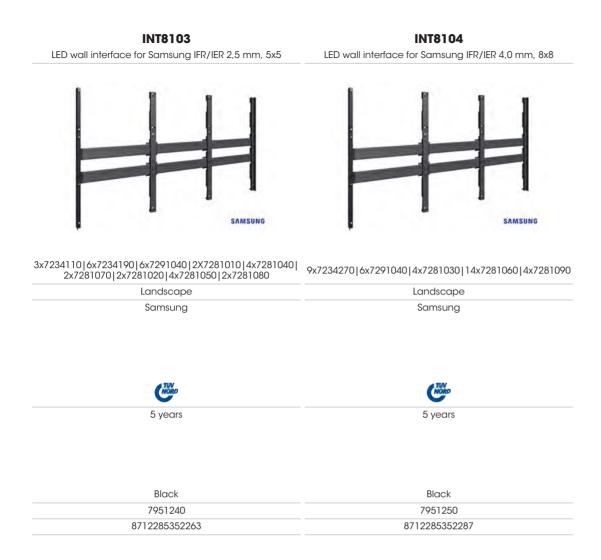

A solution for many brands

To make it easy for the user, specific interface kits are available for brands such as Philips, Samsung, LG and Optoma. These interface kits can be mounted directly on the wall, on Connect-it floor stands or trolleys and some can even be mounted on our motorized trolley. Universal interface kits are also available, of course, so there is a solution for every LED wall.

Why choose a Vogel's LED wall mount

- Both exclusively developed products for renowned LED wall brands and universal solutions
- Precision designed and manufactured with display-specific interfaces and mounting patterns
- Vogel's quality, designed to TÜV standards
- Can be combined with Vogel's unique Connect-it system
- For wall, ceiling or floor mounting
- Easy, fast and seamless installation
- Integrated or guided cabling
- Hardware easy and neat to conceal
- Lightweight aluminium frame

Motorized trolley

Robust trolley with formidable design

The PFTE 7120 motorized trolley for LED and LCD is specially designed to safely mount LED walls and LCD displays of 98" and larger. The maximum weight load is 225 kg.

The PFTE 7120 motorized trolley for LED is supplied as standard with castors and adjustable legs. If the trolley is going to be used in a fixed position, mounting the supplied feet is the most attractive and practical solution. The installation is elegant and stylish, despite its size, so it enhances any modern setting. The high-quality materials and beautiful finish give the trolley an upmarket appearance, and as you would expect from a Vogel's product, all the cables are neatly concealed in the housing.

Mounting the displays

The motorized trolley features a universal or custom interface which is suitable for any type of LED wall or large LCD display, irrespective of the brand. Vogel's supplies complete matching interface kits for popular LED displays from Philips, Samsung, LG and Optoma. The next pages show some examples.

Key features

- Adjustable in height up to 50 cm
- TÜV and CE certified
- Mobile and/or stand alone
- Lockable cabinet
- Easy install

Pop-out mounts

Video wall pop-out wall mounts are making installation and service of video walls very easy. By just gently pressing on the display the spring loaded mechanism will be released and will push the display forward. The unique top-adjustable display mounting strips provide alignment along the x, y and z axis to ensure that all displays can be exactly leveled and aligned. Beside the pop-out mechanism the tilt service position is creating even more space to install and service any display.

Key features
- Spring-loaded display pop-out mechanism
- Audible click sound confirms the display is pushed-in correctly
- Top-adjustable display mounting strips to align and level all displays in a video wall
- Custom spacers for most displays, saving drastically on installation time

Mounts for Barco UniSee

A solution for any Barco UniSee® configuration

Vogel's is preferred supplier for mounting Barco UniSee video walls. Barco UniSee video walls are virtually seamless and feature a unique maintenance system. Together with Barco, Vogel's developed special mounting adapters that present the UniSee mount at its best in any configuration.

The most common Barco UniSee video walls are straight 2x2 and 3x3 configurations. Vogel's has put together various kits for these 2x2 and 3x3 video walls using parts from the modular Connect-it series. That saves a lot of research.

Straight, curved or complex video wall

Vogel's Connect-it series is a modular system. This enables you to assemble all the parts for mounting a Barco UniSee video wall yourself, from floor plate to ceiling mount and different lengths of poles and interface plates. With Vogel's you can create all possible Barco configurations: in terms of size, position, mobility and flexibility.

Straight video wall configurations are most in demand but you can also count on us for curved and complex video wall configurations. Whether you are mounting a Barco UniSee video wall on the wall, floor or ceiling, Vogel's always offers the best solution.
